Services for a Variety of Planning Tasks

tsquare gmbh and its partners provide you with support in all matters concerning area planning and urban development.

Our partnership model creates access to all important services for our clients. Thereby new client relationships are created for our partners and new channels for tsquare gmbh for the further distribution of the [uRd].

The services for [uRd] users are:

- Support in on-site training
- Modelling with the [uRd], support in planning or complete creation of concepts/ investment proposals with the [uRd] by partners
- Interaction workshops with the [uRd] by tsquare and partners
- Extension development to the [uRd] to meet your requirements

Support in Training and in Modelling

We provide training and support during the development of your first projects. Additionally we may model your visions in the [uRd] for you based on short meetings at your location. We further enhance and prepare the data required for your decision making.

Conception Through Partner Companies

We support the conception phase for area-, quarter-, and city development with our partners. Planning offices which have worked with the [uRd] many times will develop complete development concepts with you from start to finish.

Interaction Workshop in Sensible Projects

You want to assure the acceptance of your project from all of the stakeholders? With specific interactions at each planning phase our experts mediate to achieve the necessary support for your proposals.

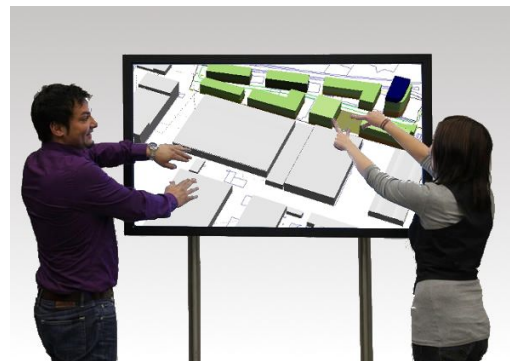

Acceptance can be obtained by integrating the stakeholders' requirements. With the [uRd] the participants use a simple tool to sketch their visions and to express their requirements. The analysis possibilities allow to visualise multifaceted aspects and to address and to solve the concerns. Thanks to the collaboration functionalities of the [uRd] the project can be optimised in these workshops in real-time. The impacts on any aspect of urban planning are immediately verifiable.

We also provide you with the equipment (hardware, software, beamer etc) for the interaction workshops.

In a Nutshell

You gain efficiency and know-how with the [uRd] and our partners:

- You receive assistance ranging from the use of the [uRd] to complete concept development by our partner companies
- Gain acceptance thanks to interaction workshops in sensitive planning projects
- Partnership model for planners and universities – participate!

Interaction workshops to gain acceptance among stakeholders

Enhance the [uRd] to Meet Your Special Needs

We are happy to optimise the [uRd] for special planning tasks for you. We analyse your specific needs on urban design elements as well as data- and calculation requirements. Particularly for special infrastructure (airfields, harbours etc), for country specific law- and planning regulations or also for ecological / economical / sociological aspects which may require client specific extensions.

The [uRd] is well prepared to integrate your specific needs.

Become our partner

You use the [uRd] recurring with your clients? Become our partner!
